Subject: RE: FY-06 SMP

We have made a lot of progress already this FY - the Site 2 (ROD), Site 17 (FFS, PP and ROD-draft), Site 10 (groundwater tech memo, RI/FS/HHRA, and PP-draft), Site 15 (PA-draft).

In making the revisions to get the October draft to reflect our current status, I re-gained the scope of what the FY06 SMP is all about - our plan and goals for the next FY.

Therefore, the draft-final (October 2005) will be the Final version of the SMP, as funding has been received. Paul revise the cover sheet to be remove the date, and add the following to the introduction section, "The drafting of this SMP was completed in October 2006 with concurrence from the USEPA and VDEQ; however, in accordance with the NNSY FFA, this SMP will not be considered as a Final document until funds authorized and appropriated by Congress are received by the Environmental Restoration, Navy (ER,N) Account, such the planned work for this fiscal year, as defined in this SMP, can be accomplished."

TEAM - please comment and revise my words if deemed necessary.

Subject: FY-06 SMP

TEAM,

The draft-final FY-06 SMP was sent to the team electronically for review. All team comments were incorporated; however, there have been some items that were completed since the draft-final was review last fall. I'm working to update these items, and will have the Final version sent out next week (hard-copy and electronically).

Thanks - Tim

v/r
